

# HOW TO INSTALL Check Note

---

1. Clean cash drawer surface so it is free from dirt and grease .
2. Peel away adhesive strip covers and mount the device on the edge of the cash drawer so the UV-light hangs over - between the two highest value note compartments. Ensure that the device is placed between the note clips so it does not get caught when you close the drawer.

3. Plug the USB cable into a USB port on the POS / PC. Alternatively, you can power Check Note with a 5V USB outlet (minimum 250mA).
